🎓 EDUCATION

Kennesaw State University – Kennesaw, GA

B.S. Software Engineering, Minor in Computer Science

Magna Cum Laude | GPA: 3.81 | Graduated: December 2025

- **Relevant Coursework:** Data Analysis , Programming and Problem Solving I + Lab, Programming and Problem Solving II + Lab, Object-oriented Programming (OOP), Discrete Mathematics/Structures, Technical Writing, Data Analysis, Database Systems, Professional Practices and Computing Ethics, Data Structures, Intro to Software Engineering, Operating Systems, Computer Organization, Software Architecture, Software Testing/QA, User Centered Design, Software Requirements, User Interaction Engineering, Software Project Management, Software Application Domain, SWE Capstone

✂️ RELEVANT SKILLS

- **Languages:** Java, Python, C#, Swift, JavaScript
- **Frameworks/Tools:** React, Django (familiar), Playwright, Postman, Git/GitHub
- **Data:** SQL, PostgreSQL/SQLite (familiar), CSV/ETL concepts
- **QA:** Agile, test planning, regression/UAT, defect tracking, documentation
- **Security:** authN/authZ concepts, secure coding basics
- **Product/UX:** Figma, Miro, Marvel
- **Business Tools:** Excel, PowerPoint

📁 PROJECTS

ReManned International – Sponsored Capstone Project

Fall 2025

- Turned sponsor feedback into simple user flows and feature requirements for a responsive web app prototype
- Built wireframes + a clickable prototype (Figma), then adjusted it after reviews and usability feedback
- Worked in sprints with the team (Git/GitHub) and helped with demos + documentation (user guide, notes)
- Supported implementation and testing by validating functionality and tracking fixes through completion.

FlowCounts – Full-Stack Accounting Web App (Team Project)

Fall 2025

- Built a full-stack accounting web app using React, Django REST Framework, and PostgreSQL/SQLite; implemented core CRUD flows for users and accounting records.
- Implemented role-based access (admin/manager/user), password workflows, and audit/event logging to support secure, traceable actions.
- Produced project documentation and test artifacts (Vision & Scope, SDD, Test Plan/STS) and delivered iterative sprint demos via GitHub.

WORK EXPERIENCE

General Devices LLC – Software QA Engineer Intern

August 2024 – January 2025

- Tested the CAREpoint Go mobile app every day (functional + regression + basic usability) to make sure workflows and UI matched requirements.
- Built and updated test plans/suites across features and real user scenarios to improve coverage before releases.
- Reported bugs with clear repro steps, expected vs actual results, and screenshots/logs when needed; retested fixes and closed them out.
- Worked with devs + product to clear up requirements, verify edge cases, and confirm changes were ready for clients.
- Helped run and maintain basic automated test scripts to cut down on repetitive manual testing.
- Wrote QA docs (test cases, test notes/reports) so the team had a clear view of risk, results, and what was covered.
- Took part in Agile routines (standups, sprint planning, retros) and called out testing status + risk early.

Target Corporation – Service Advocate

August 2023 – Present

- Help customers at checkout and guest services, including returns/exchanges, order pickup issues, and answering questions.
- Use Target's systems daily to look up orders, fix simple account/payment issues, and keep lines moving.
- Step in wherever needed on the floor and work with the team to handle busy rushes and solve problems fast.

Costco Wholesale – Cart Attendant

November 2025 – February 2026

- Helped members at the front end in a fast-paced, high-volume store (checkouts, questions, and support).
- Worked night shifts stocking and merchandising to keep shelves organized and the floor ready for the next day.

Pyramid Pro. Management Services – Pool Monitor

2021 – 2022

- Monitored the pool area, kept it clean, and made sure everything stayed set up and safe for residents.
- Enforced basic pool rules and safety guidelines and reported issues when something needed attention.
